

How to get the mind controlled to take their mask off

The mask is what is keeping the mind controlled in a state of mind control and fear.

They are so attached to it like a baby blanket, that they don't want to take it off due to fear.

Use baby steps

1. Can I see what your face looks like just for a second?"
2. When they show you, compliment them on what a beautiful smile they have.
3. Gradually use other questions like this to get them to show you their face for longer and longer periods of time, until they finally take it off.
4. i.e., "don't you find it hard to breathe in that?"
5. "why not take it off for just a minute?", etc,
