

If you still believe in the mainstream narrative, I have a few questions for you...

1. Explain how the flu disappeared but has been replaced with something which has the EXACT same symptoms.
2. Explain why, in the UK, they downgraded "Covid-19" from a high consequential infectious disease days before they declared a pandemic.
3. Explain how they pulled the coronavirus Act 2020 legislation together in a matter of days, despite the act being several hundred pages long.
4. Explain why they have completely changed normal practice and used criteria like "deaths for ANY reason within 28 days of a positive test" to classify a Covid-19 death.
5. Explain why they banned autopsies of anyone dying from/with Covid-19.
6. Explain why they changed the law to allow any practitioner to diagnose Covid through observation alone, even if it is done through video consultation.
7. Explain why undertakers have seen no difference in burials or cremations.
8. Explain how all cause mortality is at an all time low.
9. Explain how millions of protesters across the globe aren't getting sick with "Covid."
10. Explain how this is the only crisis that needs an advertising campaign paired with a constant barrage of repetitive brainwashing propaganda on the TV and in the streets.
11. Explain how hundreds of thousands of people marched through the streets of London for an afternoon last month but it wasn't once shown on ANY TV channel or reported in the mainstream press.
12. Explain how thousands were yelling "shame on you" outside the BBC HQ in both London, Manchester, and Cardiff last Saturday but it wasn't shown on the TV?
13. Explain how the people who are wearing the masks and following the rules are the only ones who are catching "COVID".
14. Explain how the creator of the PCR amplification tool is on record for stating that the PCR was not designed as a test for infectious diseases.

15. Explain why they are using the PCR to diagnose an infectious disease.
16. Explain why the concern has been changed from Covid deaths, to hospitalizations to Covid infections to Covid "cases".
17. Explain how the "anti-vaxxers" are being blamed for the rise in "cases" when the only people who could possibly be contributing to the statistics are the people who are getting the "test" in the first place.
18. Explain why the hospitals were emptier than normal during the height of the "pandemic."
19. Explain why whistleblowers are reporting that the hospitals are now filling up with vaccine adverse reactions but the MSM aren't reporting it.
20. Explain why kids need to be vaccinated when, by your own definitions, Covid isn't dangerous to children.
21. Explain, if all the vulnerable people have already been vaccinated, why do all the healthy people need to get vaccinated if you're already protected by your own vaccine and the recovery rate was already 99.96% without the vaccine.
22. Explain why the average age of death with "Covid" (82.4 years) is higher than the average age of death without (81.5 years).
23. Explain how you can get banned from Facebook and Twitter for sharing official government links.
24. Explain why there are several class actions in progress, taking governments across the globe to court for crimes against humanity, but there is zero MSM coverage.
25. Explain why most government leaders are reading from the same script.
26. Explain how all the things that you were laughing at us for talking about last year are now becoming a reality this year e.g. vaccine passports and mass surveillance (NHS app).
27. Explain why we have all the answers but you have nothing.

Thank you to the very intelligent person who wrote this up, and for the others who posted this around in the many truther groups.
